Earthmoving - Operation "SILENT NIGHT"

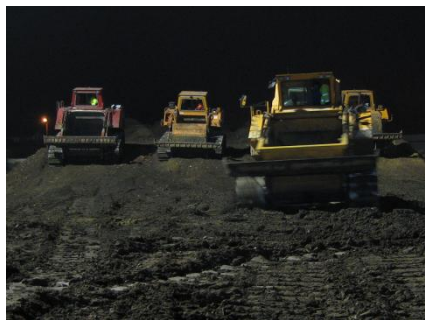

Project

From 4:15am on 24th December 2009 up until 4:15am on the 28th December 2009, the ICE-railway between Berlin and Frankfurt, next to Braunschweig, was closed for building a bridge over a new motorway feeder. Within just 20 hours the existing railway embankment, had to be removed to a landfill, which was located 200 m away.

Performance

Eight Scrapedozer-drivers from the FRUTIGER-Earthmoving team worked in two shifts, with four Scrapedozers and one reserve machine from Frutiger's 20 machine strong renting fleet. 16 hours later, on the 25th December at 2:00am, 16.000 m³ were moved. There was no breakdown of a Machine, no rain during the whole time. Operation "SILENT NIGHT" was a great success!

Teamwork by night

Deposition of the material on the 200 m away landfill.

Site after abrasion through the FRUTIGER Scrapedozers.
