## Abrasion of forest soil

### Project

Abrasion around 90'000m<sup>3</sup> forest soil with transport to the dump.

Later the soil were used to cover the depot.

### Performance

Due to the bad weather and the drenched soil , it was a big challenge for the scrapedozer.

In spite of these difficult circumstances, the Tiger could meet the clients requirement even with a daily output of 2'500m<sup>3</sup> it was never a problem to reach the deadline.

Also uphill is no Problem for the Tiger

High requirments to the Tiger in the depot

The Tiger on heavy ground
