

Reference sheet

Topsoil stripping and digging

Project

For the building of a new trading warehouse for natural food, we executed a classic topsoil stripping and digging order with stabilization on a area about 200 X 250 m.

Performance

About 15'000 m³ topsoil stripping and digging had been moved a distance of 200m

The Tiger adduced this mass in 5 steps. Site Manager, Hubert Bautz of the Company Klein was extremely happy.
